

# Decísia

*This is an event where your logical reasoning and decision making abilities will come to the fore. If you believe that you can analyse a situation and take decisions to tackle the problem elegantly, this event is for you!*

---

## Team Structure

---

*A team will comprise 2-4 people. They can be from same or different colleges.*

---

## Rounds

---

*There will be THREE rounds:*

- ~ **Prelims**- It is a written test of 45 minutes' duration. There will be TWO prelims (both offline), which will take place on two separate days of the event (**3<sup>rd</sup> & 4<sup>th</sup> March, Friday & Saturday respectively**). The teams who appear for the 1<sup>st</sup> prelims and don't qualify, will get another chance during the 2<sup>nd</sup> prelims. Also, new participants are welcome on the 2<sup>nd</sup> day. The selected teams from both the prelims will proceed to the next rounds.
- ~ **2<sup>nd</sup> Round**- The teams will be provided with a problem statement depicting a dynamic situation and the teams have to come up with a solution with solid reasons and facts. There is NO elimination in this round.
- ~ **3<sup>rd</sup> Round**- In this round, the judges will test your decision-making skills on spot. Each team shall be given 10 minutes, where the judges will give real-life scenarios, which are often encountered in industrial practice, and you'll have to take few decisions instantaneously. More such scenarios you solve, better it is!

\*\*\* The scores of 2<sup>nd</sup> & 3<sup>rd</sup> round entirely rests on the judges. The cumulative scores of the same decides the winner!

---

## Rules

---

- *No entry fees*
- *Each team should bring at least one laptop*
