

Decísia

This is an event where your logical reasoning and decision making abilities will come to the fore. If you believe that you can analyse a situation and take decisions to tackle the problem elegantly, this event is for you!

Team Structure

A team will comprise 2-4 people. They can be from same or different colleges.

Rounds

There will be THREE rounds:

- ~ **Prelims**- It is a written test of 45 minutes' duration. There will be TWO prelims (both offline), which will take place on two separate days of the event (**3rd & 4th March, Friday & Saturday respectively**). The teams who appear for the 1st prelims can **NOT** attend the 2nd prelims. So, choose a day which is more suitable for you. The selected teams from both the prelims will proceed to the next rounds.
- ~ **2nd Round**- The teams will be provided with a problem statement depicting a dynamic situation and the teams have to come up with a solution with solid reasons and facts. There may be counter questions from the judges on what you pitch. There is NO elimination in this round.
- ~ **3rd Round**- In this round, the judges will test your decision-making skills on spot. Each team shall be given 10 minutes, where the judges will give real-life scenarios, which are often encountered in industrial practice, and you'll have to take few decisions instantaneously. More such scenarios you solve, better it is!

**** The scores of 2nd & 3rd round entirely rests on the judges. The cumulative scores of the same decides the winner!*

Rules

- *No entry fees*
- *Each team should bring at least one laptop*
